

Advanced Concrete Defect Detection in Social Housing

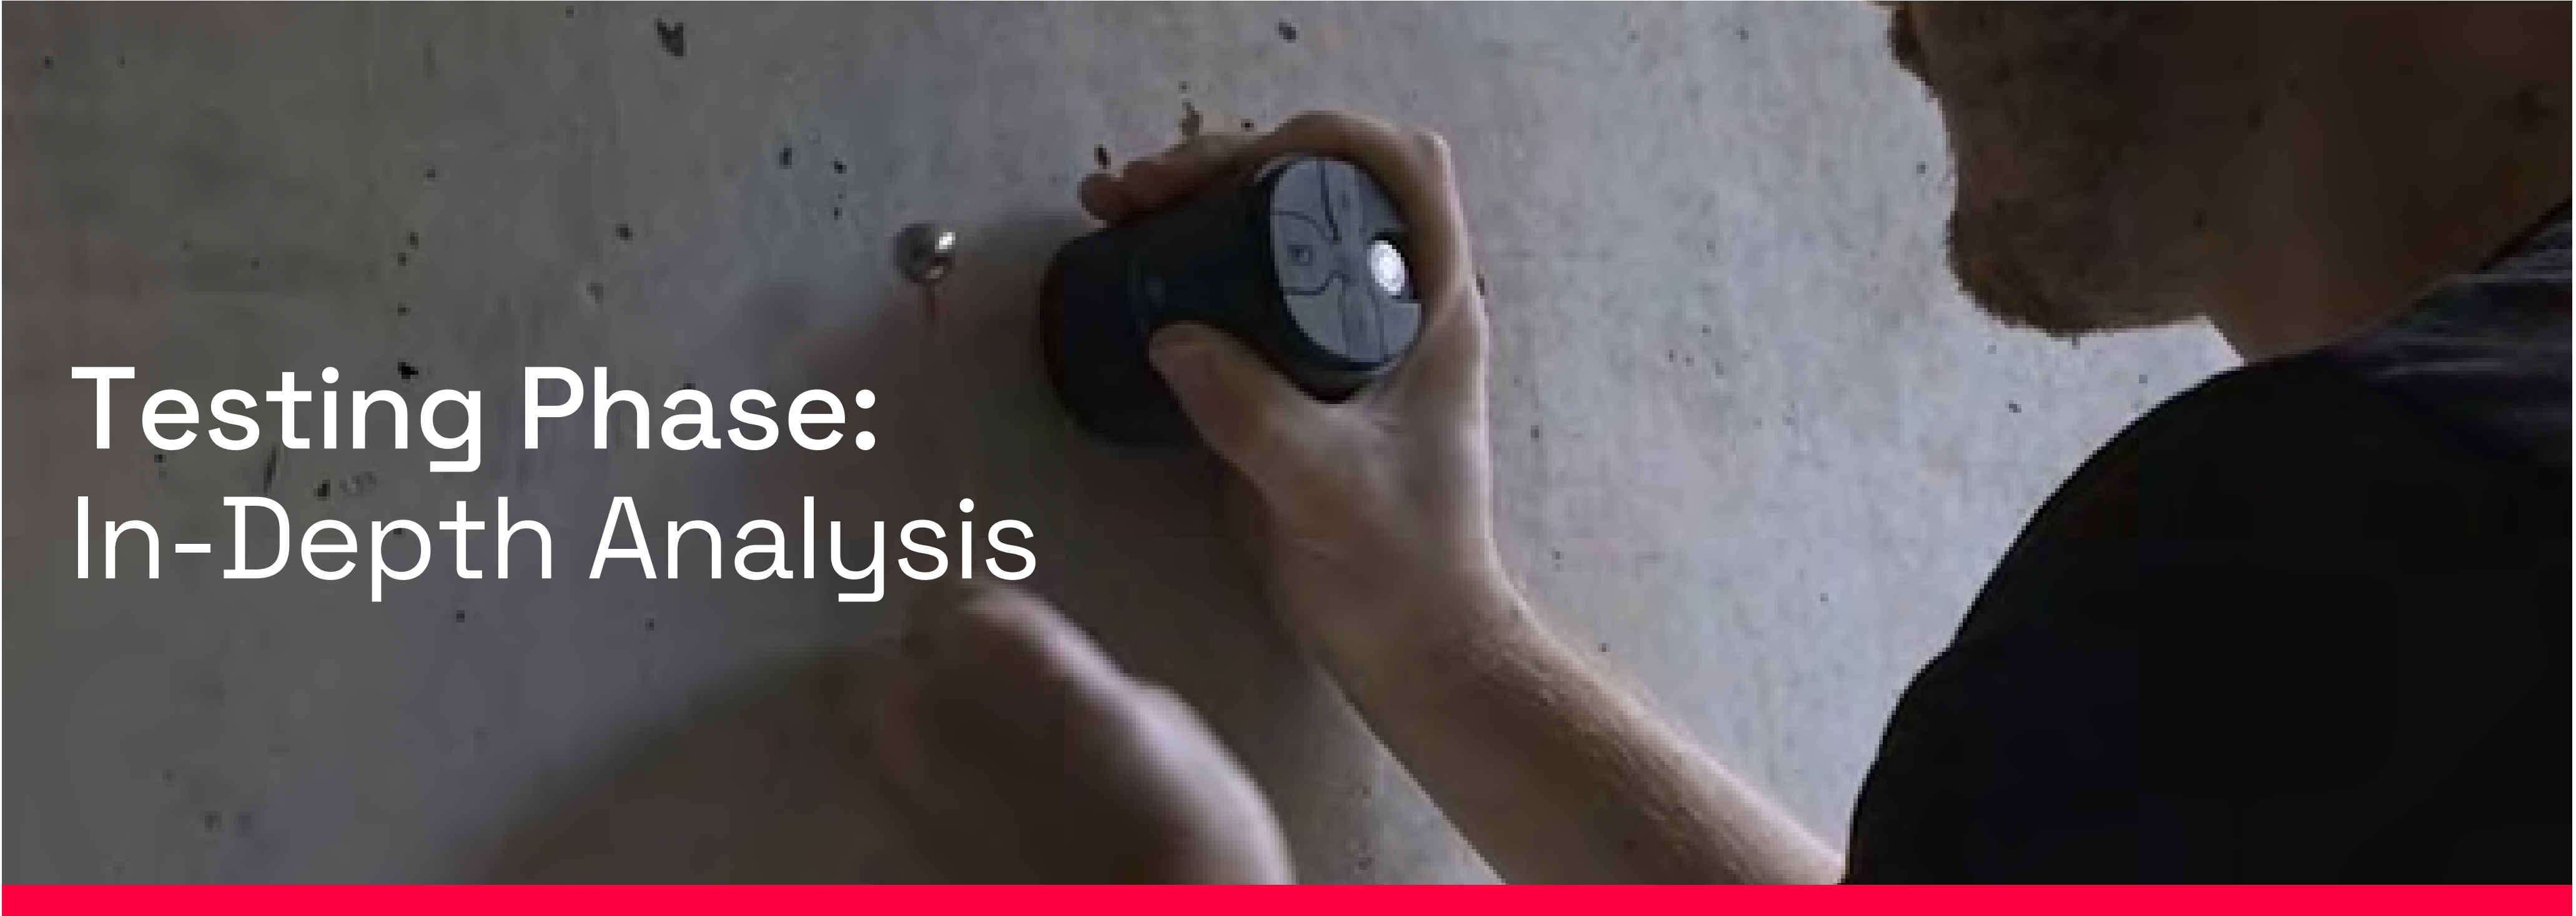

+ Prioritising Building Safety

At PM+, your customers' safety is our **top priority**. We aim to eliminate risks, ensuring safe visits to your properties.

We strive to eliminate uncertainties in your structures, providing you with clear, fact-based insights on necessary repairs. This empowers you to plan effectively within your budget and prevents costly structural failures.

A person is shown from the side, holding a handheld device against a concrete wall. The device has a circular screen displaying a graph or data. The person is wearing a dark shirt. The background is a textured concrete wall with some small holes or indentations.

Testing Phase: In-Depth Analysis

Comprehensive Concrete Structure Assessment

- + Condition Evaluation
- + Carbonation Depth Measurement
- + Chloride Content Analysis
- + Tap Testing
- + Crack Survey
- + Waterproofing Evaluation

Results Phase: Insights for Planning

- + 3D Imaging for Visual Clarity
- + Traffic Light Index for Risk Assessment
- + Detailed Specifications & Bill of Quantities
- + Tailored Repair Recommendations Aligned with Budgets

Site Phase: Implementation Excellence

- + Expert Project Management
- + Rigorous Quality Assurance Checks
- + Transparent Process
- + Contractor Accountability for Seamless Execution

Let PM+ help you safeguard
your investments and
enhance the longevity of
your structures.

**Together, we can build
a safer future!**
